DETAILED ACTION

The amendment and response filed on 5-11-2006 are acknowledged. Claims 11, 170, 174-175, 177-179, 191 and 194 have been amended. Claims 176 and 180 have been canceled. Claims 11, 169-175, 177-179 and 181-208 are pending and currently under examination.

Claim Objections Withdrawn

The objection to claim 194 for containing an obvious typographical error (i.e. Sir2 being referred to as SIR2) is withdrawn in light of the amendment thereto.

Claim Rejections Withdrawn

The new matter rejection of claims 11 and 169-208 under 35 U.S.C. 112, first paragraph, based on the limitation “one or more acetylated amino acid side chains...” is withdrawn in light of the amendment thereto.

The rejection of claim 11 under 35 U.S.C. 112, second paragraph, as being rendered vague and indefinite by the language set forth in the preamble of the claim and in step a) of the recited method is withdrawn in light of the amendment thereto.

The rejection of claim 176 under 35 U.S.C. 112, second paragraph, as being rendered vague and indefinite by the recitation of specific amino acid residues is withdrawn. Cancellation of said claim has rendered the rejection moot.

The rejection of claim 180 under 35 U.S.C. 112, second paragraph, as being rendered vague and indefinite by the recitation of specific amino acid residues is withdrawn. Cancellation of said claim has rendered the rejection moot.

Claim Rejections Maintained***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

The provisional rejection of claims 1, 171, 173, 179, 181-185, 191-194 and 207-208 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 118-130 of copending Application No. 09/735,786 is maintained for reasons of record. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the copending application are drawn to methods of evaluating the deacetylation of a substrate (histone protein) a protein comprising the Sir2 core domain while the claims of the instant application are drawn to the same methods utilizing the full length Sir2 protein.

Consequently, since all of the claims of the copending application recite open language with

Art Unit: 1645

regard to the “Sir2 core domain” they necessarily encompass the full length Sir2 protein recited in the claims of the instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

New Grounds of Rejection

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11, 169-175, 177-179, 181-208 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Applicant has amended claims 11, 170 and 191 to recite “or an N-terminal fragment thereof...” This phrase does not appear in the specification, or original claims as filed. Applicant does not point out specific basis for this limitation in the application, and none is apparent. Therefore this limitation is new matter.

Conclusion

No claim is allowed.

Art Unit: 1645

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
